water - drinkable	14	gal	6	84.0			0.00		√	

**note:** \*these shelf life figures are for nitrogen packed items

The formulas are already in this document. You need to just plug in the "on hand" amount that you have in your storage. These are only sample items. You should add or change items that specifically meet your food storage inventory. To use the above chart change the number in the forth column from 6 to how ever many people there are in your family. You should also change the goals in the "goal" column to what every your families goals are for that item.
